

Customer Service Inspections and Backflow Assembly Tester Contact List

When any property with existing water service located within the boundaries of the Emerald Bay Municipal Utility District changes ownership, the new owner is responsible for obtaining a Customer Service Inspection (CSI) on that property by a Texas State Licensed Customer Service Inspector.

Additionally, all existing backflow devices and any newly required backflow devices identified by the Licensed Customer Service Inspector must be inspected by a Texas State Certified Backflow Assembly Tester.

Note: The District grants temporary water/wastewater service for 30 days from the time of water/wastewater application for property owners to obtain inspections on their property and return inspection documentation to the District office at the address below.

**Emerald Bay Municipal Utility District
155 LaSalle Drive
Bullard, Texas 75757
(903) 825-6960**
